22/01/2009

Ministry of Communications publishes a secondary hearing for Bezeq Group on marketing joint service offers

This second hearing follows the positions received on the first hearing.

The objective of the planned amendment is to enable Bezeq's subsidiaries to market, alongside Bezeq, packages of services that include both Bezeq services and the subsidiaries' services.

That way, Bezeq and its subsidiaries will be able to offer a wide array of services to the public, and thus to allow the consumer to deal conveniently with one vendor who markets all these services in one package, instead of having to deal with several different vendors.

The deadline for submitting positions is February 1, 2009.
