* **REMARKS**

1. On condition that no interference is caused to other services that use this band on a primary basis. If such interference is detected, the amateur radio operator must cease transmissions immediately.
 2. On this band no amateur communication shall take place, if occupied by the security forces, functioning according to security procedures, verbally or in Morse identified by 3 or 4 letters and digits. In addition during army maneuvers which have been publicly advertised, or by special announcement, all amateur communication shall cease immediately without further notice from the Ministry.
 3. On this band type of emission allowed; CW (A1A), SSB (J3E), RTTY.
 4. On this band type of emission allowed; CW (A1A), RTTY. Radio Telephony SSB (J3E) allowed only by amateur stations, that are actively involved in rescue operations.
 5. Amateurs classes 'C' and 'D+' only on CW (A1A) and other digital emissions. On the 28MHz Band, also Radio Telephony SSB (J3E) is allowed.
 6. Emission type F3E, maximum power 250 Watts for license class 'A'. For license classes 'B', 'D+' and 'D' 100 Watts only.
 7. Permissible transmissions are; Morse (CW), Radio Telephony (SSB), Wireless Telegraph (RTTY), Data Transmission, Facsimile, SSTV, FSTV, or if otherwise indicated. FSTV & SSTV allowed on frequencies above 430 MHz only.
 8. Higher value power, indicated in the table, is permitted for satellite uplink only.
 9. On this band (ISM), we refer to EIRP emission, including antenna gains.
